

## Infinite Campus – In-Depth Feature Overview

### 1. Overview

Infinite Campus is a cloud-based K-12 Student Information System (SIS) that centralizes student records, attendance, grading, scheduling, reporting, communication, and administrative operations across school districts.

### 2. Core SIS / Administrative Features

- Student Master Records – demographic data, guardians, enrollment history, state IDs, residency docs.
- Enrollment & Registration – online workflows, document uploads, transfers, and school choice.
- Scheduling & Course Management – course catalog, master schedule building, conflict resolution.
- Attendance Management – daily/period attendance, codes, automated notifications.
- Gradebook & Assessment Tracking – grade scales, standards-based grades, assignment weighting.
- Transcripts & Academic Records – GPA, credits, graduation progress, historical grades.
- State Reporting & Compliance – automated state exports meeting reporting formats.
- Health Records – immunizations, nurse logs, screenings, confidential health info.
- Discipline & Behavior – incident tracking, consequences, dashboards.
- Records Retention – archive former students and maintain required retention policies.

### 3. Teacher-Facing Tools

- Gradebook – assignments, weighting, feedback.
- Attendance – classroom/period attendance tools.
- Seating Charts – visual arrangements tied to student data.
- Assignment Management – templates, attachments, due dates.
- Communication – messaging to students/parents.
- Reports – class-level analytics for performance and missing work.

### 4. Parent & Student Portals

- Real-time grades, attendance, schedules.
- Mobile apps (Campus Parent/Student).
- Notifications & Messaging – emergency alerts, grade changes.
- Payments & Food Balance – when enabled.
- Online Registration – update information and forms.

## **5. Add-on Suites & Modules**

- Campus Learning Suite – LMS-like tools and Google Classroom sync.
- Campus Food Service – point-of-sale, meal eligibility.
- Campus Payments – fee collection and processing.
- Campus Messenger – email/SMS/voice alerts.
- Online Registration – digital forms and approvals.
- Analytics Suite – dashboards and custom reporting.

## **6. Reporting & Analytics**

- Standard Reports – attendance, transcripts, assessment.
- Custom Report Writer – build and schedule custom reports.
- Data Exports – secure feeds for state systems.
- Dashboards – for absenteeism, grades, trends.

## **7. Interoperability & Integrations**

- SSO/Rostering – Clever, ClassLink integrations.
- Google Workspace & Classroom sync.
- Third-party assessment/learning vendor integrations.
- APIs for secure data access and automation.

## **8. Security & Compliance**

- FERPA-compliant data handling.
- Role-based permissions and access controls.
- Encryption for data storage and transport.
- District-level governance and privacy settings.

## **9. Mobile Experience**

- iOS and Android apps.
- Real-time push notifications.
- Parent/student dashboards.

## **10. Implementation & Training**

- Data migration and onboarding services.
- Training through Campus Community and PD resources.
- Integration setup, SSO, and rostering configuration.
- District configuration of calendars, grade scales, attendance codes.

## **11. Common District Workflows**

- New student registration → SIS record → rostering → class lists.
- Attendance → automated alerts → state reporting.
- Teacher grade posting → parent visibility → counselor transcript review.

## **12. Configuration Options**

- Custom grading scales, calendars, codes.
- Fine-grained permission controls.
- State-specific modules and compliance settings.
