LMS vs SIS — Key Differences

1. LMS (Learning Management System)

Main Purpose: Supports teaching and learning.

Key Features:
- Course content delivery (videos, lessons, quizzes)
- Online assessments and submissions
- Discussion forums and announcements
- Student progress and grade tracking

2. SIS (Student Information System)

Main Purpose: Manages student records and school administration.

Key Features:
- Enrollment and registration
- Attendance tracking
- Report cards and transcripts
- Class schedules and timetables
- Billing and fee management

High-Level Comparison

LMS = Classroom Tool — Learning, assignments, course materials.
SIS = School Office Tool — Student data, enrollment, records, fees.

Summary:
LMS handles instruction. SIS handles administration. Schools often integrate both for smooth operations.
